

# ANALYZING AND VISUALIZING WeRateDogs

## INTRODUCTION

WeRateDogs has over 600+ tweets. My analysis shows 1500+ tweets which shows the most rated dog breed as golden retriever with a rating count of over 150+

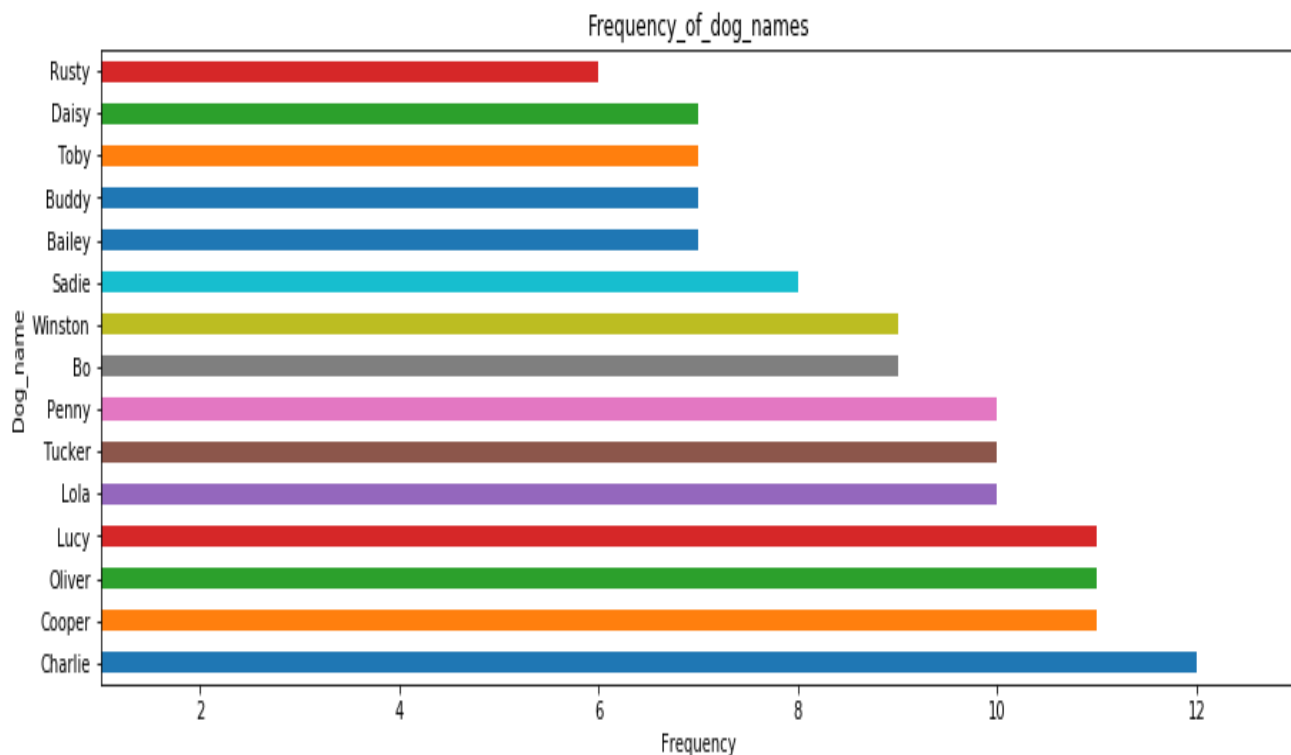

The Golden Retriever is one of the most popular dog breeds in the US. The breed's friendly, tolerant attitude makes them great family pets, and their intelligence makes them highly capable working dogs.

Golden Retrievers excel at retrieving game for hunters, tracking, sniffing out contraband for law enforcement, and as therapy and service dogs. They're also natural athletes and do well in dog sports such as agility and competitive obedience.

The picture above is a screen shot of a tweet video showing the golden retriever choose which cover is the right one. The video has over 1.3k likes and 2k views. This shows how golden retrievers (I know every dog should be cherished) are truly a gem and should be cherished. During my research on this project I have gotten to know more about various dog breeds and how much people love their dogs looking at the way they are being showcased on twitter.

These dogs are fairly easy to train and get along in just about any home or family. They are great with kids and very protective of their humans. If you want a loyal, loving, and smart companion, then you should consider adopting one of these pups into your pack.

This bar chart shows the 15 most frequent name given to dogs with Charlie having the highest frequency. Most dog names are similar to names given to a human. People then choose human names because of the close relationship between a dog and a man.
